NOTICE OF THE FIELD MANAGER'S PROPOSED DECISION

INTRODUCTION

This document addresses the issuance or renewal of your grazing lease. A proposed decision is required by the Code of Federal Regulations (CFR) 4100 to be served on any affected applicant, permittee, or lessee who is affected by the proposed actions, terms, conditions, or modifications relating to issuance of a grazing permit/lease.

BACKGROUND

The current grazing permit/lease for the Johnny Creek Allotment, #4001, expired on 2/28/07 and you, the lessee, for this allotment requested a renewal. An Interdisciplinary team completed a **Land Use Plan Conformance and Determination of NEPA Adequacy (DNA)**, #OR-054-06-117, for this proposed renewal. The DNA is available from the Prineville District upon request.

PROPOSED DECISION

Therefore, it is my proposed decision to issue you a grazing lease, authorization #3602000, on the allotment listed below. Your grazing lease shall be for period of ten years (2007-2016) and will reflect the following:

Allotment Name and Number	Livestock		Grazing Period		% Public Land	Type Use	AUM's
Johnny Creek Allotment, #4001	Number	Kind	Begin	End			
	53	Cattle	4/01	11/30	100%	Active	424

Due to the computer calculation rounding, the above AUM's may not correspond with your actual grazing preference. Your actual grazing preference is shown below.

Total animal unit months (AUMs) are 423, of which 423 are Active and 0 are Suspended.

Other terms and conditions of the lease will be as follows:

♦The BLM is in the process of implementing the standards for rangeland health and guidelines for grazing management. This lease is subject to further modification as necessary to achieve compliance with the standards and guidelines (43 CFR 4180).

♦Lessees are required to submit actual use grazing records within 15 days of completion of the year's grazing use.

♦Salting of livestock within one-quarter mile of water is prohibited. Supplemental feeding of livestock on public lands is prohibited without prior authorization from the BLM.

Lessees are to provide reasonable access across private land and leased lands to the BLM for the orderly management and protection of the public lands as allowed in 43 CFR 4130.3-2 (H).

♦A statement disclosing the requirement that permittees or lessees shall provide reasonable administrative access across private and leased lands to Bureau of Land Management for the orderly management and protection of public lands.

RATIONALE

Based on the review of DNA #OR-054-06-117, I determined that this renewal meets the criteria for a Determination of NEPA Adequacy (DNA) and that no additional environmental analysis is required. Further more, the renewal conforms to the applicable land use plan and that the NEPA documentation fully covered the proposed action and constitutes BLM's compliance with the requirements of NEPA.

As noted above, the petition for stay must be filed in the office of the authorized officer and served in accordance with 43 CFR 4.473.

Any person named in the decision that receives a copy of a petition for a stay and/or appeal. If you wish to respond, please reference CFR 4.472 (b) for procedures to follow.
