RE: Public Comments

Dear Sir,

Thank you for the forum process and visiting Cottage Grove.

The basic nature of the plan reduces the stands of remaining old growth forest. These areas are too important to the riparian areas near our rivers. I hope we increase our standards of water quality and preserve our old growth forests. Take a plane ride to Seattle and you'll see that our forests in general look like they went to a Bad barber! I don't agree with the basic volume of trees to be harvested.

Please add stronger language supporting "ecological sustainability."
