To Those in Charge of Western Oregon Plan Revisions,

As residents of Griffin Creek Road we wish to express our concern about the proposed off road vehicle site for Anderson Butte. Our homes are located below a ridge with a road system coming off of Anderson Butte that occasionally has off road vehicle activity.

Over the years we have experienced many of the negative impacts of this use including noise, trash being thrown in areas where we hike and bicycle, target shooting and bonfires and fireworks during dry seasons.

If the BLM decides to designate the area for this type of activity it will encourage far more traffic than we are now experiencing. The area is close to Medford and therefore could invite a very large number of OHV users.

We believe that designating this area for off road vehicle recreation will destroy some of the beauty and quiet that drew us to live here.

We hope that you will listen to our concerns when you make your decisions.

Sincerely,

Shelley Tanguary
