Bureau of Land Management,

I oppose the Western Oregon Plan Revisions proposed by the Bush Administration. The vast majority of the U.S. populace wants to see the ancient forest that still remain standing here in the Northwest protected once and for all. Please make the arrangements necessary to do so. Let us focus instead on thinning the overcrowded second growth forests that past clear cutting and forest mis-management has turned into severe fire hazards. I do not support the creation of new roads built through oregon's forests. Thank You for receiving these comments and respecting the wishes of oregon's hard working citizens.

Sincerely,

Brian Mawlia-Lausen
