Dear Ms. Woods:

I am entirely opposed to the proposed transfer of our valuable water resources from the eastern part of Nevada to the southern part of our state. The Owens River Valley of eastern California comes to mind. Interbasin transfers of water make no sense and could have lasting effects on the ecosystem and wildlife in the areas that will be drained. Those unintended consequences always seem to come home to roost.

Please give consideration to my request that you not approve any water transfers.

Sincerely,
Theresa Horgan
