Subject: Fwd: maps of seamounts/canyons?
Date: Monday, July 10, 2017 12:54:37 PM

Ann, can you get this printed in Reston and bring it here in the next week or so? Jason offered to do it at Woods Hole and mail it, but that would get irradiated and would fall apart after it was unrolled a couple of times. I would like a copy that is 3 feet by 5 or 6, whichever is the natural proportion to go with 3' on the narrow side.

No problem. What shipping address would be best?

Jason

Hi Randy,

We can get you something that should meet your needs. When do you need it by?

Best
Jason

Actually its a little more than one expedition. I am working on the Secretary's review of national monuments, and am looking for information that might indicate why the particular area designated as the NE Canyons and Seamounts was chosen, i.e. how is it different from other areas of canyons and seamounts along the East coast, if there are any. Since most of those directly involved in the discussions were political appointees who are no longer here, there is a certain amount of reconstruction involved.

As part of this, it would be very helpful to have a map or maps showing other canyons and seamounts, from perhaps Virginia to Maine and out to the EEZ boundary. The map or maps need not be in great detail at this point, as long as it or they show those features.

Hi Ann,

Which expeditions are being referred too?

Hi Jason,
I am cc-ing Randy Bowman at DOI who is looking for the maps from the most recent expeditions?
Can you help?
