John P has invited you to **edit** the following spreadsheet:

DOI spreadsheet for spreadsheets

Team,

Here is a spreadsheet where you can enter the document ID and the number of people listed in a spreadsheet when coding datasets such as "PDFs July 20 Uploads". The spreadsheets are usually scanned PDF documents. Look for the number of people (i.e., signers) in the comment or within the spreadsheet. Estimating is ok if a number isn't listed.
