Thank you - I was looking for the 279,347. You determined the input numbers exactly as we expected - there is no other way to do it here.

In some cases the spreadsheets had row numbers, so if there were 200 rows, we counted them as 200 comments in the mass mailing. Sometimes I estimated, e.g., 30 pages x 10 names per page = 300.

and attached it to this email. If anybody has any others please pass them along.
Best regards,
John

I've checked, and many of the attachments are in pdf format - see cluster 192, over a thousand individual comments in a pdf, one page per comment, 4 sets of these. The comment that shows in the individual record when you open the cluster says how many comments are attached, at least in this cluster.

Also, please recall that attachments with "zxc" in the opening sentence are attachments received by mail at DOI, counted, and then uploaded to regs.gov so they are publicly available. Please do not count them again.

We can filter for just docs with spreadsheets attached if that helps.

No, I believe there are too many - I found 24 in the first 200 near duplicates this morning, one claiming 45,000 names - but thank you for asking. I think collecting them in a spreadsheet as before is the most effective course.

Randy,
Do you want to be **emailed** about the spreadsheets as we find them?
Thanks,
John

Thank you - there are larger ones out there yet

document id: DOI-2017-0002-605843

This is a spreadsheet claiming 25,643 individual names and addresses. Coded as (1) Mass Mailing. Just bringing to Randy's attention if needed.
