Dear Western Oregon BLM,

167✓

It is shameful that the people must continuously fight with our government to protect our environment and resources. Lip service to wildlife habitat while bowing to the timber industry will no longer go unnoticed. All protections for old-growth and streamside preserves must be upheld, and the best available science must be considered, as required by the Endangered Species Act. Stop the greed of the timber industry. Stop the WOPR. Protect the remaining old-growth habitat. Protect Spotted Owls and all endangered species. Unless your consciences have been replaced by cash-flow implants, you know the truth.

ONLY YOU CAN PREVENT FOREST LIARS

Sincerely, Art Skach
