Dear Jody
BLM Western Plan 8/15/07

Aerial views of the Cascade Mtn Range is disheartening. I am unsatisfied with the management of our natural resources.

I lean more to the conservation side of this issue. An 11% increase in timber sales this year, and 7% next year is too aggressive. I would prefer a policy of "selective" rather than sustainability management.

To increase revenue for public services, I suggest:
1) Export finished manufactured products rather than whole logs
2) Increase taxation of wealthy individuals.
3) Increase collection efforts of delinquent taxes.
