To: Bureau of Land Management
re: Western Oregon Plan Revision draft

Please include this comment in the public record.

Your proposed revision to the Northwest forest Plan may provide short-term economic gains at a time when we MUST be far-sighted and address the issues of global warming: reducing carbon in the atmosphere and protecting our water and air supplies require us to strengthen the Northwest forest Plan.

Please reconsider your goals: protect the irreplaceable ancient and stream side forests and their watersheds, reduce clear-cutting and road-building, revitalize the fisheries.

NANCY CABLE

What will the penalties be
if you implement this plan?

Sincerely,
Nancy Cable
