Dear BLM,

NIX WOPR (non) "preferred" Alternative! - Instead - go with the common sense Community Conservation Alternative!

Save our precious dwindling islands of old growth forests (with great diversity & waterquality that are healthy for humans too), that would also save alot of tax $ and promote jobs & the economy.

You work for American citizens - Not industry! Do your job! - Protect Our Public lands, waters & wildlife!

Your attention to this most urgent matter would be much appreciated by all present & future generations of all species.

Thank-you,
