Dear BLM:

Comment Re: WOPR

I am totally against the Bush Administration's most recent plan to open our public forests to being exploited by the timber industry. Our BLM forests need to be protected from vast clearcutting. Our few and last remaining old growth forests must be protected and permanently saved. We can't get them back once they are destroyed. Science shows the absolute folly of clearcuts and destroying old growth. The Bush Administration doesn't listen!

Thank you.

Sincerely,

Irene S. Bernstein
