To: Bureau of Land Management

This is in reference to your Western Oregon Plan Revisions (WOPR). None of the three action alternatives are satisfactory because none of them offer responsible, sustainable management for healthy forests.

Please manage our public lands in a way that will be beneficial to the beutiful wild plants and wild animals that remain on this planet.

Please protect and preserve what little old growth trees are left.

Please do not designate the John's Peak/Timber Mountain area as an "Off Highway Vehicle Emphasis Area". OHV use basically ruins the area for most other human activities such as wildlife observation, hiking, picknicking, mushrooming, enjoying wild plants, etc.

Please manage our lands in a manner that we taxpaying citizens want them to be managed — that is WISELY!!

Our old growth forests and fish and wildlife are precious. Please protect and preserve them and their habitats. Very sincerely yours,

Jack Helvie
