What about this environmental analysis are you specifically concerned about?

The analysis does not provide specific impacts to Hiko, Crystal, & Ash Springs in Pahranagat Valley. It does not provide sufficient information on the long term effects this entire project will have on quality of life for current and future residents of Pahranagat Valley, their livestock & resources.

What is missing from this environmental document?

① This DEIS fails to disclose project costs and sources of funding.

② This DEIS establishes no reasons for granting approval to a project that will impose harmful, irreversible impacts on public lands and resources

What other comments or questions do you have?

Because of the large number of unknowns and inaccurate science, the BLM should delay any decisions on granting approval of this pipeline.

I strongly support the "NO Action" alternative and request a 180 day comment period extension
