To Whom it Concerns: The revision, Alternative 2 of the Western Oregon Plan Revision, must protect T 19S. R. 06W. Sec 17 as a Late Successional Management Area. The old growth stand and nearby older forest are an important treasure representing a diversity once dominant and now, sadly rare in our area. The plants, birds and trees need these protected areas to flourish, and to serve the nearby urban areas with opportunities to study and understand complex issues of botany and biology. Please honor and respect this valuable area through the Late Successional Management Area status. (1700)

Thank you. Sincerely, Ruth Koenig
