RE: "WOPR" DEIS

A Majority of Oregonians have expressed their wishes that the BLM PROTECT (NOT Clearcut) Old Growth forests on public lands, to thin second growth forests and protect communities from wildfire (which can best be done by thinning - NOT Clearcutting and by protecting Old Growth forests!)

I am not against responsible logging but this DEIS proposes clear-cutting at a 9-1 ratio over thinning with major emphasis on logging old growth forests.

BLM - we repeat - leave the old growth alone! We want clean water, healthy ecosystems and wild life habitat, wild places and real forests.
