Subject: Lander RMP

Dear Mr. Oakleaf;

In regards to the Lander Community SRMA.

Is there a provision to use equipment such as trail dozers build trails?

In order to create enough trail for a 6 to 8 hour MTB ride there needs to be much more trails. I feel the labor pool of the Lander Cycling Club is not adequate to create such a trail system in a timely manner which it desires. There are professional trail builders (and grants to help pay for them) who can design and build such a system.

I support alterative B but hope we are not stuck building trails by hand until the next RMP revision.

Thank you for the opportunity to comment on the future of non-motorized recreation in the Lander area.
