Dear State Director of Geospatial Services F. David Radford,

Dear Bureau of Land Management ("BLM"),

I strongly support the proposed mineral withdrawal to protect the watershed of the Boundary Waters Canoe Area Wilderness ("Boundary Waters"). The threats posed by sulfide-ore copper mining are unjustifiable in the watershed of such a sensitive and important area.

Besides the incredibly important data in this form letter, I have always wanted to go to the boundary waters and the idea of being somewhere where there's so little light pollution and be able to see the sky in such an incredible way it's only possible in a place like this. As an administration and during his campaign Biden expressed how important it is to keep in mind the climate crisis. Getting involved with this project is the opposite of keeping the climate crisis in mind. We need to be moving forward with legitimate ways to protect our planet in our country

The Boundary Waters is America's most popular and water-rich Wilderness Area. Its 1.1 million acres contain more than 1,000 pristine lakes and 1,200 miles of river and stream, offering unmatched fishing, hunting, and other public lands wilderness recreational opportunities for all Americans to enjoy. Priceless and irreplaceable, the Boundary Waters must not be put at risk of perpetual pollution from the most toxic industry in America.

During environmental review of the proposed withdrawal, please be sure to thoroughly address the following:

· Cleanest water quality in North America - The lakes, rivers, and streams of the Boundary Waters watershed are among the cleanest waters in North America and are especially sensitive to acids and heavy-metals found in copper mine pollution;

·America's most visited & accessible wilderness destination - The Boundary Waters is the most popular Wilderness Area in the U.S., and the largest east of the Rockies and north of the Everglades. Visitors travel through it by boat or canoe, and can choose routes to avoid having to carry their gear, making the Boundary Waters more accessible to families, children, and people with physical limitations; and

· Economics - The Boundary Waters supports a strong, sustainable, growing outdoor recreation industry in Minnesota. It is a principal driver of the $850 million, 17,000-job recreation economy in Northeastern Minnesota, it contributes to hundreds of manufacturing jobs, and it helps keep and attract talent to Minnesota.

I urge the BLM to withdraw the 225,378 acres of national forest lands to protect the Boundary Waters from the threat of endless sulfide-ore copper mining pollution. Thank you for the opportunity to comment.

Sincerely,
Michelle Merola
