Re: BLM Western Oregon Plan Revisions

Dear BLM:

I am deeply upset with the WOPR. The changes the BLM is contemplating will unravel and undo the protections of the Northwest Forest Plan, and will lead to water pollution, degraded habitat, diminished production of oxygen from the trees & increased carbon dioxide release.

WOPR proposes to increase old-growth clearcutting at a time when public support for old-growth protection and second growth thinning has never been stronger.

Please protect the remaining, cherished old-growth forests. Focus active management of BLM lands in already logged over areas. The don't need more roads and

off highway ~~Vehi~~ Vehicle
Emphasis areas.

Sincerely,
Lida Edwards
