Dear BLM:

I strongly disagree with the Western Oregon Plan Revision, [WOPR] which will undo the protections for BLM administered forests.

WOPR proposes widespread clearcutting. Wildlife rely on BLM forests all over the state. The WOPR would reduce protections for wildlife populations and also diminish habitat for countless plant & wildlife species.

BLM lands in western Oregon contain approximately about 1 million acres of the remaining older forests. The WOPR threatens some of Oregon's best remaining ancient forests. Two thousand sq. miles of forest would be put in "Timber Management Areas" where clearcutting is emphasized.

The BLM cannot eliminate protection for old growth forests, without undermining the NW Forest Plan and protections for threatened & endangered species + clean water. To do so, the BLM needs to violate the endangered Species + Clean Water Acts and other Laws.

Please hear me, and protect our remaining old growth forests. Please don't multiply your past mistakes.

Sincerely,

Michele L Scherer
