Our family has been enjoying riding our quads and Rhino for years. This is a family activity for us. It allows us to get away as a family and enjoy time together without normal daily distractions.

Please consider our voice to be heard!! In the WOPR there aren't trails for OHV recreation, although there are dozens for non-motorized uses. Even though it is motorized recreation that is growing at a much faster rate than non-motorized recreation.

Oregon is well known for our outdoor recreation and that is why my family lives here. You are taking that away from us. More research and energy needs to be given to see how many people you are truly effecting. Not to mention the huge retail business you will be ruining for this already struggling part of oregon. My husband would not have a job anymore, and so we would leave the area. Also because we would have a place to enjoy our motorized recreational activities!

Please consider our voice!!

Even though he's only 4, He has a voice that needs to be heard too!!
"Please don't take away my ~~[illegible]~~ riding area with my family. I love to ride in my Rhino." "Daddy needs a job too, don't hurt the Rhino retailers."
