Dear so and so

2399

I'm so fucking pissed off at the continuous bull shit being fed we the people and the continuous destruction of the earth for the benefit of the few. I am quite aware of the frustration of the poor and working class. People are waking up to what's really going on and nothing can remain hidden forever. Please be aware that the entire human race looks to you to save what little bit of wild nature remains. Your ancestors look to you from beyond, your descendants wait for the decisions you make. Your public record and decisions will stand for eternity, and your descendants will be held accountable. Please chose wisely.

P.S. They're my Kid's trees!!!
