The fact that I am writing this letter makes me wonder "what is happening?!"
Does breath not live you? Does money or power or popularity or survival of a few break our humanity? Blind you to your own survival needs of fresh air, fresh water and the wholeness + wisdom offered without question by whole ecosystems? Have you stepped out of the power towers and into the forest? Stood by the ancient trees + witnessed yourself as more than this finite life of the body. Do you know you are part of something so big that you are effortlessly immortal as a part of this planets life... no need for the struggle for power or influence or to be significant + prove your worth?

I am sorry for the pain of numbness this system + power structure imposes on those in it. I pray you are able to step into the grass, take a deep breath of fresh air and know yourself. And even if you don't take this chance, that you preserve the right, the opportunity for your children + the lives you ~~ton~~ office to protect and serve.
