To The BLM:

RECEIVED
JAN 11 2008

I am concerned about this new plan for our public lands. For many generations we in S. Oregon have worked to protect our special lands and trees. It would be very thoughtless and crazy to open up our small percentage of lands set aside for protection. There is no where else to go. The loggers on the other side of the mountain have already cleared it away. Please do not take the last of our beautiful forests away. Don't follow the insane ideas of a lame duck president. Wait just a few months when we have good leadership again that understand we can't take it all —

Sincerely,

Carol B Schrodt

I would like a response:
