To the B.L.M. :

Fully realizing that our comments come at the deadline for public input on the B.L.M.'s W.O.P.R., we nonetheless do wish to weigh in with our strong opposition to this greatly flawed plan. This proposal would have a devastating effect on millions (2.6) of our public forests and streams, and would pose a serious threat to the northern spotted owl and the marbled murrelet which are listed under the Endangered Species Act as threatened with extinction. Please consider an alternate plan that would not rely on clear cutting our forests, damaging our watersheds, and threatening our endangered species. W.O.P.R is short sighted and does not appear to look to protecting the future of our precious western Oregon forests, streams, and their inhabitants. Thank you for your consideration.

Yours truly,

Richard + Barbara Suter
