This is so I can explain what the costs were. It would probably help if you could include how many hours of project management time we had contracted for, including the first round of additional funding.

Please work with Marsha on what it should contain. Also please include the hours for dealing with the last set of comments for receipt to when they were ready for coding.

The largest portion of project management related to getting the 98 files downloaded or uploaded.

Just let me know if you want a formal proposal or if you can work directly with contracting to extend the required budget lines to the extent required for another month of all three components. As I noted, you exceeded the storage quota so the renewal is slightly more expensive.

Sorry, got interrupted. We would seem to need at least a one-month extension on the license agreement as well as more project management funding.

I don't have a budget, will need to tin-cup again to get the money, so need to limit it to what we need to get this project completed. Was most of the project management funding spent over the last week, or was it a constant drain?

Randy,

July we shot through the project management budget. I think the overage should be covered by excess in the student budget, but regardless, the DOI budget is mostly spent.

The software licenses expire on August 23rd.

Would you like a proposal for a new license and services agreement? Perhaps it would be good to look at a yearly model?

Stu
