To whom it May Concern,

RECEIVED
OCT 26 2007

BLM state director Ed Shepard said "above all, most of these lands were set aside years ago to provide a steady source of forest products & revenue..."

I guess he is forgetting that they were Reserves, off limits to logging 13 yrs. ago by the Northwest Forest Plan.

That's a little different from the BLM calling for a 700% increase in old-growth logging on 2.6 million acres over the next ten years. Opps!

We already know the effects of 1,000 miles of logging roads per decade will do, learn from the past.

Under the WORP, wildlife salmon, recreation & clean water will play second fiddle to

Over.

Timber profits.

Alternative 1 is the only way to go. Again learn from the past & leave Oregon a better place to live in the comming years. I'm a former logger.

THANK you very Much.
