Dear Stewards of Americas forests,

President Bush has Come up A whole lot of Bad Ideas during his day, But this WOPR is the WORST! Instead of Cutting Down our Precious Old Growth Why not Plant HEMP? Instead of Civilizing the Last Wild Places Why not Give Thousands of Oregonians Jobs Planting Hooch on Millions of Ugly Devastated lifeless acres from Previous Clear Cuts. I'd like to think Oregonians are smarter than the Corporate Cronies from Washington. There are no Edible Wild Salmon Runs on Any Atlantic Seas Rivers, is that the Role Model we want to follow. Do We Really want to Increase the Wealth of A few HUGE CORPORATIONS or Enrich the lifes of Billions of lifeforms GOD Put here for a Reason? Do we need more Roads to Nowhere or would Sustainable, Superior, inovative Building Products made from Hemp Make more sense in the long Run? Forget the WOPR. Allow the One leggeds to Stand Proud, MAKE Oxygen, filter the Air & Sun, Hold the dirt on the Hills, Provide food and Shelter for all the Creatures...

Sincerely,

Dave Hamson
Eagle Point, Or.
