Hi my name is Jim Etzel, I live in Hackensack, MN. I have commented on this before and I will do it again. The planet is not in good shape. If we are to set a new course for humans, then our activities need to change also. Mining will cause environmental damage and the by products of this operation will cause damage when they spill. Please protect the natural world by keeping the ban on mining in the designated area for as long as possible. In my opinion it should be forever.
Ecology over economy(money)
