Subject: [EXTERNAL] Please restrict mining in BWCA/Lake Superior watershed
Date: Saturday, December 18, 2021 12:33:58 PM

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

The BWCA is one of the few places left where you can drink from a lake. It provides peace and sanctuary to the animals that live there and the people who live and visit. It is a national treasure that needs to be protected.

It provides revenue in the form of tourism which is sustainable only if it is protected and maintained.

Mining would be a temporary help to the economy but has the very real potential to devastate it.

I fully support banning all mining anywhere in the BWCA and Lake Superior watersheds.

Thank you for your consideration.
