Dear State Director of Geospatial Services F. David Radford,

To the reader of this message, to a fellow American.

It is your duty as a citizen of this country to protect the precious resources and grand natural gifts this land holds. Preserve our waters, the streams, lakes, and rivers that we drink from. The same waters that we and all the other animals find meals. Preserve the crisp air that we breathe, and the views of the stars overhead. The span of acres contains invaluable assets, not simply copper to be mined, but things far more crucial for the survival of American life within the natural world.

Sincerely,
Nicholas Reece
Newport, KY 41071
