Dear State Director of Geospatial Services F. David Radford,

Industrialism and Capitalism has gone too far and it is very evident when you get generations like gen z and gen alpha are constantly told in their schools and social media that they're the ones who need to stop the cycle despite having no control over it. Even millennials who have started change can do nothing for how far our world has gotten but promoting less plastic use and creating innovative technology that cleans plastic out of the oceans for us. Our planet is directly in the hands of the few major industries that own most of our companies contribution to all this pollution. Don't contribute more, we cannot afford it. Our children and grandchildren cannot afford it.

If anything that spot provides a great tourist attraction and can provide jobs. It's a habitat to many great species and should be protected. Be well good day

Sincerely,
Analicia Jackson
