Dear State Director of Geospatial Services F. David Radford,

Dear Bureau of Land Management
The boundary waters are a amazing sight a place where there is so little light pollution that the night sky is crystal clear. It is one of the last chunks of undisturbed nature in america. The mining will bring light and water pollution to the many lakes in the area. When I look out my window or go out camping I wont be able to see any stars in the clear night sky. If the mining starts then the sky will be just as polluted as out crowded cities. Please do not allow mining in the boundary waters zone.

Sincerely,
Aidan Mcdonald
