Thank you for listening to the pleas of so many people to protect the BWCAW from potential contamination from sulfide ore mining nearby. The Secretary of the Interior should withdraw the mining permits in the BWCAW watershed. This is not the place for mining. As perhaps the wildest place in the lower 48, with the cleanest water and the most Wilderness visitors, the BWCAW should remain protected from the threat of mining waste water.
Growing up in Utah, I have had the honor to visit many wild places, but none are as wild as the BWCAW. This is a special place that deserves special protection.
Wild gratitude,
Suez Jacobson
