Dear State Director of Geospatial Services F. David Radford,

Dear Bureau of Land Management

The reason I am writing to you today is that, I highly against the Boundary Waters project. I've recently learned this is a Dark Sky Sanctuary. As a lover of astronomy since I was a child, it would be a shame to to have factories on the border of the lakes that which would introduce light and water pollution. There aren't many natural water resources and places with completely clear night sky. I believe it's the upmost importance to have dark sky, to have clear air, water and sky but for educational purposes also. Being able to learn about the stars with a family member or taking astral photography are some of the important moments you'd be taking away from those who visit the Boundary Waters

("BLM"),I urge the BLM to withdraw the 225,378 acres of national forest lands to protect the Boundary Waters from the threat of endless sulfide-ore copper mining pollution. Thank you for the opportunity to comment.

Sincerely,
Anijah Slusser
