Dear State Director of Geospatial Services F. David Radford,

Dear Bureau of Land Management ("BLM"),

There are so little areas left in our world where the air, water, and land are as clean as they are in Boundary Waters. We've already done so much damage to the planet, some of which may be irreversible.

I'll share a story with you. Glacier National Park. I've never been, have you? My science teacher has. He told us that they had to actually look for glaciers, because they've melted so much. He told us that we have about five years to go see the remaining glaciers before they're gone.

What does this have to do with Boundary Waters, you ask? If you allow this construction to happen, the amount of time people have to see the beautiful wonders of this place is going to become a ticking clock. A place that should be a pride and joy of our country is going to be ruined and desiccated by human greed. For once, think of something other than money. Don't let this happen.

Sincerely,
Sydney Hunter
