Dear State Director of Geospatial Services F. David Radford,

Dear Bureau of Land Management ("BLM"),

My name is Avery Dixon. I live in Mid-Missouri and go to college here. I am studying to be a teacher. As a young person and someone who will be teaching the next generation, it is important to me that our planet retains its health and actions like those planned for the boundary waters pose great risks to the health of our planet. Not to mention these are some of the most beautiful parts of our country with clear lakes and a night sky so dark you can apparently see all the stars. I hope to travel there soon to see it and as someone who loves the stars, it is important to me that my kids will get to share that love, but if these actions go through, they will not be able to see the stars and constellations I have learned to love or play by the lakes during the day. Please, build a better future for our kids. Protect our planet. It’s in your hands.

Sincerely,
Avery Dixon
