Dear State Director of Geospatial Services F. David Radford,

Dear Bureau of Land Management

I strongly support the proposed mineral withdrawal to protect the watershed of the Boundary Waters Canoe Area Wilderness ("Boundary Waters"). The threats posed by sulfide-ore copper mining are unjustifiable in the watershed of such a sensitive and important area.
As a young American who wants to see the world for its beauty i strongly ask you to not do it. There only so many places in the us that are close to me where there's still a chance for part of our country to be untouched and left alone for the environment and the water. I'm not sure if that makes sense but just know I love our earth and I'll do pretty much all I can to give us some time to figure things out because our planet is dying and this thing your doing would hurt the earth more probably and Americans already hate this idea there gonna hate the government more listen to us u don't want the backlash even from other countries they lost every flaw about American let's prove them wrong and and show the government will help us and not do it for there own personal gain

Sincerely,
Olivia Olivares
