Dear State Director of Geospatial Services F. David Radford,

Dear Bureau of Land Management ("BLM"),

I strongly support the proposed mineral withdrawal to protect the watershed of the Boundary Waters Canoe Area Wilderness ("Boundary Waters"). The threats posed by sulfide-ore copper mining are unjustifiable in the watershed of such a sensitive and important area.

As an Environmental Science student who has always been passionate about the beauty of the natural world, preserving what little natural world we have yet has always been important to me. Sulfide-ore copper mining could only bring destruction and pollution with dangerous side effects to all living things that rely on the waters of the Boundary Waters.

Mining out the Boundary Waters will bring nothing but destruction and temporary economic benefit to a beautiful natural area that has existed for millions of years. You might die having extra money in your pocket, but the ecosystem and beauty of the Boundary Waters won’t recover for future generations to enjoy.

Sincerely,
Seoyeon Park
