Dear State Director of Geospatial Services F. David Radford,

Dear F. David Radford,

Please do not let a mining company get a lease to begin work near the boundary waters. I know how much money they mine has a possibility of bringing to the economy and the surrounding localities, but mines are known to destroy environments. The reserve would be affected for centuries after the mine had closes leaving the water polluted and the landscape destroyed. The reserve is also widely used and known for its dark skies which are increasingly rare to find. I would like to know that there would still be a few places on the Midwest where future generations would be able to actually see the stars and the universe.

Sincerely,
Robert Wing
