FORM 1

Documentation of BLM Wilderness Inventory Findings on Record

1. Is there existing BLM wilderness inventory information on all or part of this area?
No (Go to Form 2)_____ **Yes** __X_____ (If yes, and if more than one area is within the area, list the names of those areas.):

a) Inventory Source: Montana BLM's Initial Inventory (November 1978 – August 1979)
Montana BLM's Intensive Inventory (August 1979 - November 1980)

b) Inventory Area Name(s)/Number(s): Flat Creek/MT-065-290

c) Map Name(s)/Number(s): BLM Montana Wilderness Inventory Maps:
Final Initial Inventory Map (August 1979)
Proposed Wilderness Study Decision Map Lewistown & Miles City Districts (March 1980)
Final Inventory Decision Map Lewistown & Miles City Districts (November 1980)

d) BLM District(s)/Field Office(s): Lewistown / Phillips Resource Area

2. BLM Inventory Findings on Record:
Existing inventory information regarding wilderness characteristics (if more than one BLM inventory area is associated with the area, list each area and answer each question individually for each inventory area):

Inventory source: Montana BLM's Initial Inventory (November 1978 – August 1979)					
Area Unique Identifier	**Sufficient Size? (acres)**	**Naturalness?**	**Outstanding Solitude?**	**Outstanding Primitive & Unconfined Recreation?**	**Supplemental Values?**
MT-065-290	YES (31,640)	--	--	--	--
Comments	Includes 640 acres of State and 1,240 acres of private lands. The naturalness of the area is impacted by the reservoirs, the roads into the northern areas, bladed fire lanes, contour plowing, a water ditch, and a cattleguard. These impacts are partially mitigated by the large size of the unit.				
Inventory source: Montana BLM's Intensive Inventory (August 1979 - November 1980)					
MT-065-290	YES (26,860)	NO	NO	NO	NO
Comments	The one parcel which meets the size criteria does not contain sufficient screening to provide outstanding opportunities for solitude. Opportunities for primitive recreation are not outstanding. This unit will not be studied for wilderness.				

FORM 2

Current Conditions: Presence or Absence of Wilderness Characteristics

a. Area Unique Identifier__South Flat Creek - 23_____ Acreage___7,002_____
(If the inventory area consists of subunits, list the acreage of each and evaluate each separately).

(1) Is the area of sufficient size? *(If the area meets one of the exceptions to the size criterion, check "Yes" and describe the exception in the space provided below),* Yes_X_____ No _____
(Note: If "No" is checked the area does not have wilderness characteristics; check "NA" for the remaining questions below.)

This area contains over 5,000 acres of contiguous BLM-administered lands.

Description *(describe the boundaries of the area – wilderness inventory roads, property lines, etc.):*

This unit is long and narrow, approximately 8 miles by 1 mile. The boundaries of this unit are defined by private and State lands to the south, east and west and a BLM maintained road to the north.

(2) Does the area appear to be natural? Yes _____No ___X_____ N/A_____
(Note: If "No" is checked the area does not have wilderness characteristics; check "NA" for the remaining questions below.)

Description *(include land ownership, location, topography, vegetation, and summary of major human uses/activities):*

This unit includes portions of 3 grazing allotments with approximately 4 miles of interior fence and at least 4 reservoirs scattered throughout the western half of the unit. 2 new dugout pits are visible within the northeast corner of the area.

Several miles of vehicular routes transect the length of the unit generally in a north-south direction.

Topography of the unit is broad basin and gently rolling glaciated upland. Major types of vegetation are a mix of short and mid-grasses, sagebrush, greasewood and bare soils.

Right of ways for irrigation facilities have been granted in the following location: T25N R30E, sec. 25, SWNW; T25N R31E, sec. 31, lot 1, W2NE, NENW.

Due to the low, relatively flat topography and narrow nature of the inventory area, the surrounding crop and hay fields and farm buildings are apparent from almost any vantage point from within the unit.

(3) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for solitude?
Yes_____ No_____ N/A__X____

Description *(describe the area's outstanding opportunities for solitude):*

(4) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for primitive and unconfined recreation? Yes_____ No_____ N/A__X____
(Note: If "No" is checked for both 3 and 4 the areas does not have wilderness characteristics; check "NA" for question 5.)

Description *(describe the area's outstanding opportunities for primitive and unconfined recreation):*

(5) Does the area have supplemental values (ecological, geological, or other features of scientific, educational, scenic or historical value)? Yes_____ No_____ N/A__X____

Description:

Summary of Analysis*

Area Unique Identifier: South Flat Creek - 23

Summary
Results of analysis: *(Note: explain the inventory findings for the entirety of the inventory unit. When wilderness characteristics have been identified in an area that is smaller than the size of the total inventory unit, explain why certain portions of the inventory unit are not included in the lands with wilderness characteristics (e.g. the inventory found that certain parts lacked naturalness).)*

1. Does the area meet any of the size requirements? Yes__X__ No_____

2. Does the area appear to be natural? Yes_____ No__X__ N/A__X__

3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? Yes_____ No_____ N/A__X__

4. Does the area have supplemental values? Yes_____ No_____ N/A__X__

Check one:

_____ The area, or a portion of the area, has wilderness characteristics.
__X__ The area does not have wilderness characteristics.
