December 3, 2012

Arizona Public Service
Arizona Corporation Commission
Bureau of Land Management
City of Peoria
Maricopa County
Arizona State Land Management

To whom it may concern:

We would like to thank the respective individuals from the above named entities for their hard work and collaboration in determining the "Certificated Route" for the power lines that Arizona Public Service will be utilizing to install the service.

We sincerely appreciate your efforts at locating the power lines north of State Route 74 and not in within the northern portion of the Vistancia community.

With so many different agendas together with the myriad of special, individual and group interest in where the power lines would be installed we want to thank each of you for your contribution in helping to arrive at this decision.

Very truly yours,

[redacted]
