Dear Sirs:

am submitting a comment in support of the Copper Flat mine. The United States needs responsible domestic production of natural resources. The Copper Flat mine will produce copper and other valuable metals in New Mexico and will operate according to federal and state regulations that are in place to protect workers and the environment. And for goodness sakes, this is a brownfield redevelopment of a former copper mine! There is nothing "pristine" about the area.

Regards,

Joel Schneyer
