Dear Brian,

1 "Whatever happened to Smokey The Bear? Bring back Smokey The Bear education ads!!! Education is the answer! Why chemicalize thousands of acres of pristine open range land in 17 western states? The chemicals will end up in your, and our air, soil, ground water and the food chain. Will the chemicals drift over onto organic ranches and farms? Why not use Alternative C – no more applications of herbicides! I have been made very sick and thousands of dollars later I am chemically sensitive, so I am extremely concerned for you and anyone this will impact! There is no good long term safety data on these products to be used. What about children, adults as well as the innocent wildlife? Why poisite? Please choose Alternative C, the no herbicide use alternative! Use the money instead on an aggressive advertising education! Please, chemicals have their place, but this one is not it! Thank you

1 cont.

for your "compassion" for innocent people and wildlife. Thank you for keeping our air, soil, ground water and food chain unpolluted!!!

Extremely concerned,

BJ + Trish Hastings
