Dear Mr Amme,

1 I am writing to voice my concern over the proposed spraying of flame retardants, herbicides, + pesticides on the wild forestland of the 17 Western states. This measure would endanger the native plants + animals of these areas, contaminate + disrupt the natural ecosystem, poison our air, water, + soil, + increase the risk of cancer + other serious illnesses to the inhabitants of these regions.

2 I urge you to reconsider this measure + protect the health of the people + wildlife in these lands.

Sincerely,
Nancy Stern
