Reno, NV

Subject - Draft Veg. Treatments using Herbicides

1 I am in full support of BLM to use Herbicides on BLM Lands in the 17 western states, so long as the applicator is certified and label recommended rates are applied

2 I want to see BLM control noxious weeds on their lands and reduce the negative impacts already experienced by neighboring private landowners.

3 BLM lands are infested with noxious weeds ~~and~~ that release seed onto private ~~to~~ owned lands

4 BLM lands that are now annual grasslands due to cheatgrass or medusa head rye infested need chemical treatments to get native grass and veg. re-established
