Brian Amme, Project Manager
BLM
P.O. Box 1200
Reno, NV 89520-0006

Dear Mr. Amme,

1 I have just learned of the plan to triple annual herbicide use in western states to almost a million acres.

2 I live in a wilderness area adjacent to BLM property and this concerns me very much. There are negative impacts from toxic sprays on water quality, soil productivity and wildlife. I urge you to effectively manage "invasive" vegetation with non-herbicide methods i.e. alternative C.

3 Is my area being considered for aerial spraying of herbicide? It is easy and less expensive and unhealthy,

4 unhealthy, unhealthy. Please don't do it.

Thank you.

Sincerely, Maria Globus
