Subject
Brian Amme, project manager, BLM Nevada State Office - "Vegetation Treatments Using Herbicides Programmatic EIS."

Mr. Amme,

The use of herbicides is not an effective way to deal with invasive plant problems. It is also very important that the BLM make a specific measurable commitment to reducing reliance on herbicides. It is imperative tht the BLM adopt strong prevention-based practices for activities that encourage invasive plants. Please conside the causes of invasive plant problems such as: livestock grazing, road construction and use, use of off-road vehicles, timber harvests, and fuel reduction projects. 1 2

Thanks for considering my feedback on this issue. I would appreciate less toxic BLM lands for our use and the use of future generations. 3

Sincerely,
Dee Tvedt
