February 8, 2006

To Saguache County Commissioners:

1 We the undersigned are very concerned about the possibility chemicals (i.e. Round Up) might be used to spray the roadsides in our county. We know there are alternatives (i.e. mechanical mitigation, goats, etc.) to control "invasive" weeds. ~~There~~ Children, sensitive people, animals, beneficial insects & plants all could be negatively affected if spray is applied. Please be in solidarity with us against this threat to our & the Earth's health. Thank you.
